About

I am a Communications and electronics engineer who is seeking an opportunity in frontend web development. I am passionate about creating modern, clean, and responsive websites that offer the best user experience.

Education

- Bachelor of Electronics and Communication Engineering at Thebes academy, Egypt [2018 - 2023].

Skills

- **Languages:** HTML, CSS, JavaScript, TypeScript, C++, Python.
- **Frontend:** Next.js, React.js, Tailwind CSS, Shadcn/UI, Redux toolkit, React Query, React Form hook.
- **Database:** Firebase, MongoDB, Supabase.
- **Version control:** Git & GitHub

Experience

React.js developer at Intern2grow [May 2023 - Jul 2023]

- Worked in different types of projects using different tools and techniques such as **JavaScript, CSS** and **React.js (Functional** and **Class components)**
- Fixed various issues and implemented new features to enhance existing projects.

Projects

Bloggify web site

- Implemented the ability to get **MDX** files from a GitHub repository and display them in their format on the page.

- Added several routes for each page using Next.js app router and server-side components, which make it better for **SEO**.

- Allowed the users to see posts updates instantly by clicking the refresh button or after one day of publishing the post.

Blog nook

- Implemented the ability to write, edit, and delete posts feature for each user with their own posts.

- Implemented the ability for each user to write comments to other users' posts.

- Added real authentication using **Clerk**, which is a third-party tool that allows users to sign in or sign up with their Google account or emails.

E-commerce app

- Fetched data from an **API** to get the required products for the application.
- Added several routes/pages using **React Router Dom** to separate each page with its own function.
- Implemented many features to allow customers to browse, search, and purchase products online in an easy way.

Van Life

- Used firebase firestore to store vans and customers data.
- Added real authentication using firebase authentication feature to allow customers to register to rent vans and show their own information.

Languages

- English: Very good   - Arabic: Native
